Mr. Sam Unger, Executive Officer

California Regional Water Quality Control Board

320 W. 4th Street, Suite 200

Los Angeles, Ca. 90031

Re: Item #14 on the July 14th 2011 Board Hearing

Dear Mr. Unger,

I am an area businessman and member of the stakeholder's discussion group relative to the prohibition area for the Civic Center area of Malibu.

I am writing to express my support for the approval of the proposed MOU between the City of Malibu and the RWQCB. As a person who cares deeply about protecting water quality and needs to be able to explain what is being done to promote it to my clients, I appreciate the clarity and rational basis of the MOU.

I also believe that this MOU is politically viable and will receive the support of the home and property owners when it is time to vote for the assessment districts. The proposed phasing plan detailed in the MOU is defensible on financial, scientific and political grounds. The Commercial property owners are largest users of the system and the most supportive proponents. They are willing to live through being the pioneers and prove the technology. Their experience will make it easier to get approval from the homes in phase 2 that have the potential to impact Malibu Creek and the Lagoon.

I appreciate the effort that has gone into process that has resulted in the MOU. I hope that the Regional Board will join the City Council of Malibu in approving the MOU as written so that we can quickly move forward with the construction of the necessary infrastructure.

Sincerely,

Paul Grisanti
